Re Item V.

The following document is referred to in this communication:
D1: DE 24 51 329 A (HAAGSE BAKKERIJMACH) 22 May 1975 (1975-05-22)

2 INDEPENDENT CLAIM 1

2.1 The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT. Document D1 discloses (the references in parenthesis applying to this document): A device for forming a dough portion comprising a pressure roller (8) and a counter roller (8) placed below it for in between them rolling out the dough portion into a dough slice, wherein the device comprises a conveyor belt (1) for conveying and at least in the direction of conveyance supporting the dough slice to a further treatment device (2) during and after rolling out, wherein the conveyor belt (1) is passed through between the pressure roller (8) and the counter roller (8) and abuts the counter roller (8).

3 INDEPENDENT CLAIM 21

The same reasoning applies, mutatis mutandis, to the subject-matter of the corresponding independent claim 21 which therefore is also considered not new.

4 DEPENDENT CLAIMS 2-20, 22,23

Dependent claims 2-20, 22, 23 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT).
